SUMMARY

Looking for an opportunity in Web and MERN Stack Development where I can utilize my knowledge of Java, Advanced Java, Python, JavaScript, React.js, Node.js, and databases to create effective and responsive applications. Eager to improve my technical skills, gain practical experience, and contribute to the growth of the organization as a developer.

EDUCATION

Dr. Babasaheb Ambedkar Technological University, Lonere , Maharashtra

2022 – 2026

Bachelors of technology in Computer Engineering

CGPA: 7.5

Kai. Sau. G.F. Patil Jr College

2019 – 2021

Maharashtra State Board Of Secondary And Higher Secondary Education (HSC)

Percentage: 76.20

Sheth V .K. Shah Vidya Mandir, Shahada

2018-2019

State Board of Secondary Education (SSC)

Percentage: 83.60

SKILLS

- **Programming Languages** - C | C++ | Java | Advanced Java | Python | JavaScript.
- **Frontend Technologies** – HTML | CSS | JavaScript | React.js
- **Backend Technologies** – Node.js | Express.js
- **Database** – MongoDB | MySQL
- **Tools & IDEs** – VS Code | Git | GitHub | npm
- **Deployment** – Vercel
- **AI Productivity Tools** – ChatGPT | Google Gemini
- **Soft Skills:** Communication | Teamwork | Problem Solving | Active Listening | Coordination

Internship

MERN Stack Developer – Blue Soft Infotech

Mar 2026 – Present

- Working with MongoDB, Express.js, React.js, and Node.js to develop responsive web applications.
- Gaining hands-on experience in frontend development, API integration, database management, and debugging.
- Assisting in developing user-friendly interfaces and improving application functionality.

TECHNICAL PROJECTS

Embedded Message System | Java, MySQL

Apr 2025 – May 2025

- Developed a secure web-based messaging application using Java and MySQL for sending and managing messages.
- Implemented database connectivity, user authentication, and message management features for secure communication.
- Designed a simple and user-friendly interface with focus on data handling and application functionality.

Fruit Image Classification | Python, OpenCV, CNN, EfficientNetB2

Aug 2024 - Dec 2024

- Developed a desktop-based fruit classification application using Python, OpenCV, and Convolutional Neural Networks (CNN).
- Implemented image processing and machine learning techniques to identify and classify different fruit categories from images.
- Designed the system to improve classification accuracy through trained CNN models and optimized image handling.

Unique Logo Authentication System | Python, OpenCV, Machine Learning

- Developed a deep learning-based web application to identify genuine and fake logos using EfficientNetB2 and CNN techniques.
- Implemented image preprocessing, feature extraction, and logo classification using OpenCV, TensorFlow, and Keras.
- Built the system using Django with user and admin modules for logo prediction, history tracking, and feedback management.
- Achieved around 95% validation accuracy through data augmentation and optimized deep learning model training.

CERTIFICATIONS

- Certificate in C, C++, java, Advance java, Python Programming – MCCE
- Certificate in “Beginning C++ Programming – from Beginner to Beyond”-Udemy ([Certificate](#))
